in-memory
computing with
over 50 engineers
from HP & SAP
working together?*

SAP HANA from HP: The Big Data Solution for Small and Medium Enterprises

No matter what the size of your organization, you can accelerate access to your business data with SAP HANA built on an HP Converged Infrastructure.

Go BIG with HP for SAP HANA

Logicalis can help your organization take advantage of HP scale-out configurations that support very large data volumes on SAP HANA. These systems also provide options for automated failover for high-availability or semi-automated, "disaster tolerant" failover to a secondary site.

The HP portfolio, delivered by highly-qualified Logicalis experts, offers complete, pre-integrated solutions that are tuned and optimized to deliver maximum performance for your SAP applications.

What is SAP HANA?

SAP HANA is an in-memory database technology that leverages the low cost of computer server memory (RAM), the data processing abilities of multi-core processors, and the fast data access of solid-state drives to deliver better performance of analytical and transactional applications. SAP HANA supports relational data, semi-structured and unstructured data management within the same system.

What is an SAP HANA Appliance?

Together with HP, Logicalis is able to deliver SAP HANA preconfigured as an appliance providing in-memory computing bundled with hardware, software and managed services.

Contact Logicalis for a SAP HANA Workshop Today

As an expert in SAP HANA on HP, Logicalis has created a workshop for SAP clients who are considering HANA solutions. This in-depth, one-on-one workshop is held on-site at your company's location. It is designed to help you identify the right business analytics solution for your company, and will help you create a long-term strategy that allows for scale-out while delivering the best total cost of acquisition and total cost of ownership positions possible.

Why Logicalis?

Logicalis is one of HP's largest national Enterprise Solution Partners in North America, with a nearly two decade relationship. We have been recognized by HP for both our product acumen as well as our solutions expertise. Our engineers collectively hold hundreds of HP certifications, including the highest levels of certification available for all HP Servers, Storage, Networking, and operating systems.
