

Experience

What our clients are doing.

Clients are using the Logicalis Enterprise Cloud for a variety of uses including:

- **Infrastructure as a Service** - running enterprise class applications
- **Disaster Recovery/High Availability** - building a trusted DR partnership leveraging Logicalis compute resources and managed solutions.
- **Application Test and Development** - working with Logicalis consultants to build custom applications that are hosted and managed within the Cloud
- **Hosted Cloud Platform for Software Vendor** - leverage the Logicalis cloud to provide a hosted infrastructure for SaaS solutions
