

Cisco Solutions, along with Logicalis, provides unified voice, video and data, as well as security and networking solutions that increase productivity and maximize ROI.

Cisco Solutions

Logicalis is one of the world's leading Cisco integrators, with more than 30 locations in the US, as well as operations in 10 countries and more than 1,100 employees worldwide. Logicalis provides support for all aspects of the network lifecycle and is a specialist in Unified Communications, Data Center, Wireless LANs, and Security. As a long-time Cisco Gold Partner, Logicalis has the expertise and experience required to:

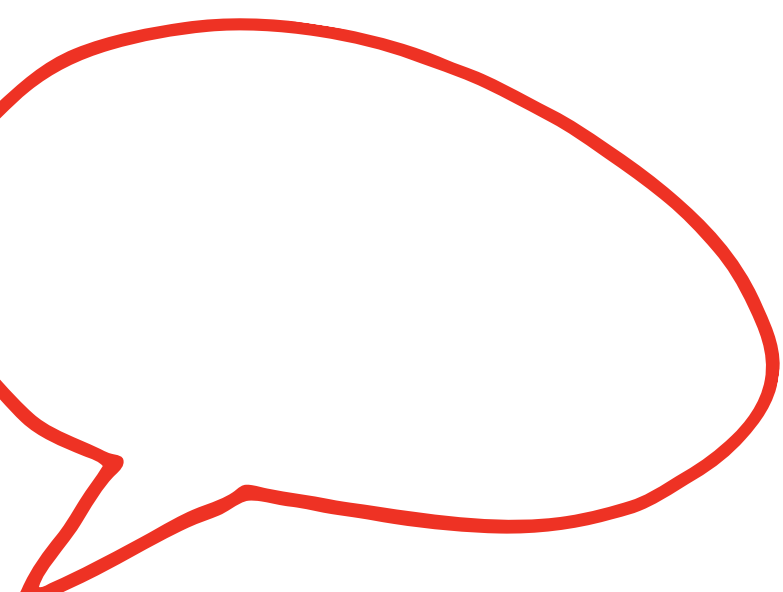

- Bring together voice, video, and data seamlessly and securely over wired and wireless networks.
- Design and implement networking solutions that meet our customers' technical and business requirements, with a focus on maximizing ROI.
- Design and implement Data Center solutions, including Storage Area Networks and Application and Acceleration.

Unified Communications

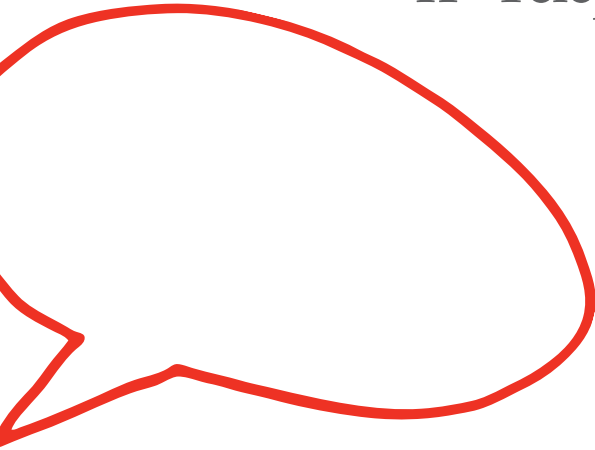

The promise of Unified Communications is more than just the combination of data, voice and video sent over a single Internet Protocol (IP)-based network. Unified Communications provides a true integrated network where users communicate and collaborate, complexity is removed, access is no longer limited, productivity is increased, and business processes are streamlined. Logicalis has the advanced training, knowledge, personnel and experience to deploy complex, large-scale Cisco Unified Communications solutions.

Cisco Awards & Recognition

- Managed Data Center Cisco Powered Private Cloud Service Designation—First partner to earn this designation.
- 2009 Cisco Global National Enterprise Partner of the Year Award
- 2009 Cisco Central Region Commercial Partner of the Year Award
- 2009 Cisco ATP-Data Center Unified Computing Partner Award
- 2009 Cisco Customer Satisfaction Recognition
- 2008 Cisco European Partner of the Year Award
- 2008 Cisco Services Partner of the Year Award
- Cisco Data Center Unified Computing ATP
- Cisco Master Unified Communications Specialization
- Cisco TelePresence ATP Partner

Logicalis is one of only a few companies in the world to have achieved the highest level of certification in Cisco Systems Unified Communications, IP Communications and IP Telephony Services specializations.

Data Center

Our Data Center practice not only incorporates Cisco technology, but also includes expertise in server and storage virtualization and consolidation, as well as Storage Area Networking, Wide Area Applications Services (WAAS) and Data Center infrastructure design and deployment.

Mobility

Through years of experience, Logicalis realizes that the potential of wireless communications requires a strategic approach that encompasses many areas. It takes the following components working together to create a unified wireless network, that can support both voice and data:

- Client Devices
- Access Points
- Network Unification
- Network Management
- Mobility Services

Security

At Logicalis, our focus on security ensures that every system we implement has security as a principal design factor. We also help customers with legacy networks evaluate their security vulnerabilities, create a plan for proper remediation and define a long-term strategy to avoid future deficiencies.

Borderless Networks

Our end-to-end approach to routing, switching and network management allows you to manage the network centrally and still provide everyone in your organization—including those at remote sites—access to the same business applications and services with the same level of performance.

TelePresence

At Logicalis, our TelePresence methodology is to deliver solid and proven solutions to fit our customers' needs. As a Cisco TelePresence Advanced Technology Provider, we can help your organization evaluate, design, install and support your entire Cisco communication portfolio. Our strategic approach to collaboration will help enable your organization to cut costs, enhance employee, customer and partner communication, and enable faster decision-making throughout your organization, all while simplifying the management of your IT environment.
