

LOGICALIS' DATA CENTER DESIGN SOLUTIONS SERVICES LET YOU BUILD YOUR DATA CENTER FROM THE GROUND UP OR REDESIGN EXISTING FACILITIES.

DATA CENTER DESIGN SOLUTIONS

Since your data is your most valuable asset, don't just house it. Enhance it.

A strong and successful data center strategy requires having access to all the necessary specialists and making sure they communicate their needs to each other at appropriate times. Proper data center development requires a diverse set of skills and a holistic approach. Logicalis has the range of skills from IT consulting to engineering to ensure that your new or refreshed data center meets all standards and exceeds expectations.

Key data center opportunities allow you to:

Save Money and Energy — Advances in cooling technologies save you money and reduce energy consumption.

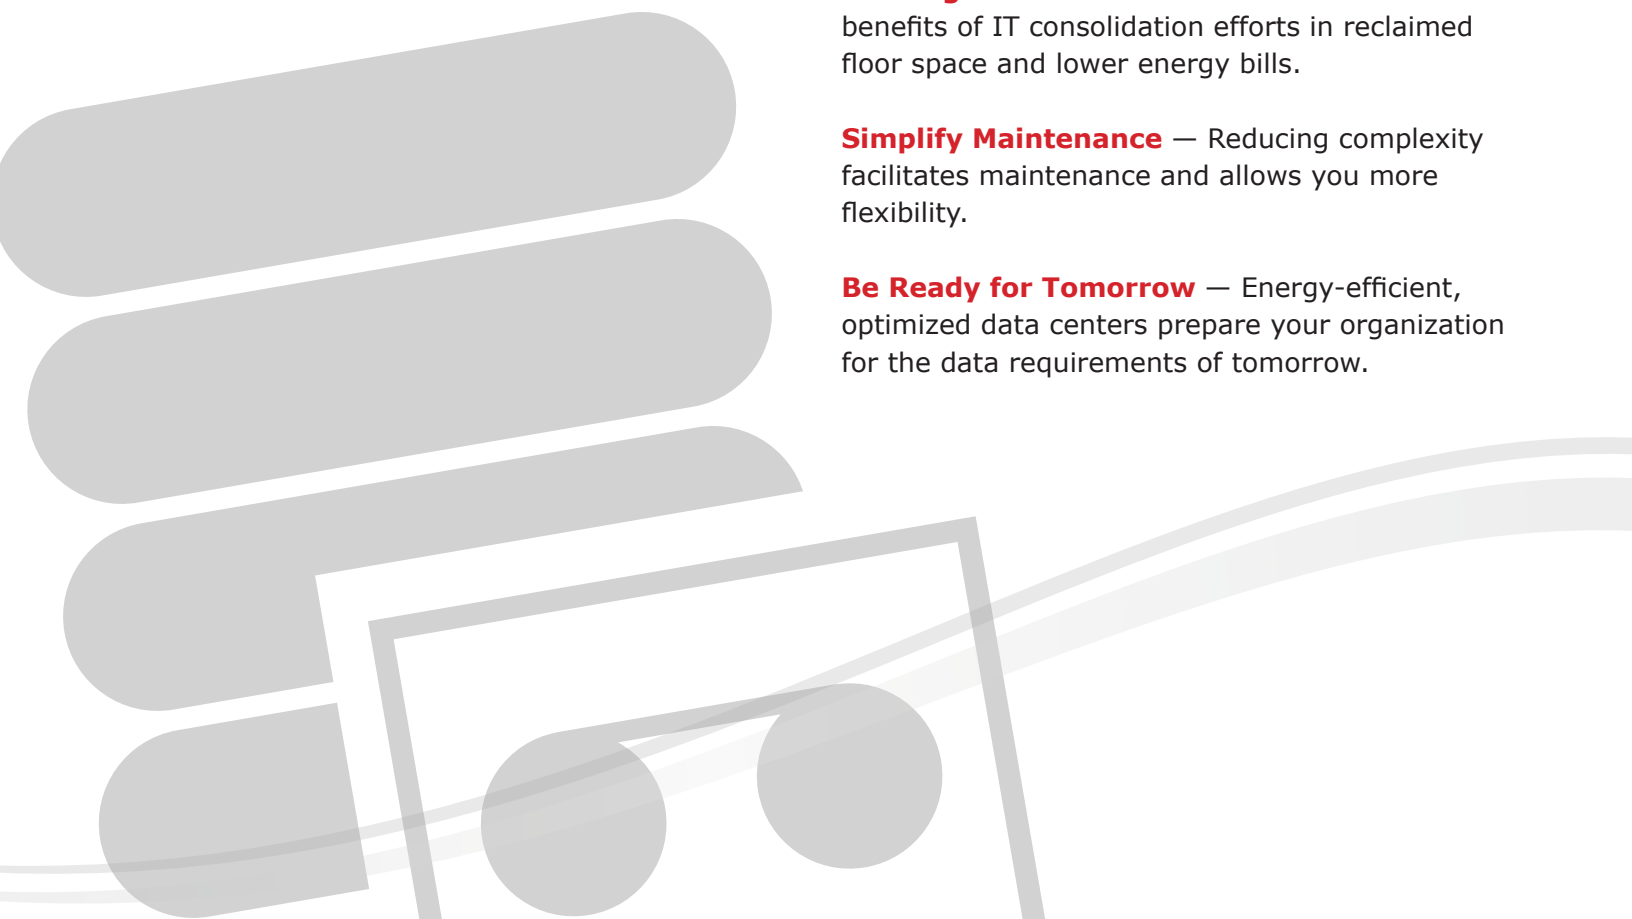

Become More Responsive — Rationalized IT systems make it easier to respond to changing demands.

Become More Prepared — Implementing the latest IP-based monitoring tools eliminate surprises to help build a true "lights-out" room.

Leverage IT Consolidation — Realize the full benefits of IT consolidation efforts in reclaimed floor space and lower energy bills.

Simplify Maintenance — Reducing complexity facilitates maintenance and allows you more flexibility.

Be Ready for Tomorrow — Energy-efficient, optimized data centers prepare your organization for the data requirements of tomorrow.

“Their knowledge of every aspect of data center design insured we had the best power, backup, and cooling strategies for our facilities. Logicalis took care of the details, enabling us to complete our project on time and under budget.”

Dr. Bill Jenkins, IT Operations Manager, Otay Water District

LEVERAGE COMPREHENSIVE KNOWLEDGE

Build your data center from the ground up, literally, with the help of skilled consultants who hold the highest-level certifications and understand the full range of solutions, including:

- Data Center and DR assessments
- Strategic planning, financial modeling
- Power, capacity and lifecycle planning
- Full-service data center design, including electrical, mechanical, telecom, and operational systems
- Full range of telecommunications designs
- Network and SAN architecture design, implementation of complex data center environments
- Vendor-neutral consulting and planning
- Refurbished green savings options
- Knowledge-based RFP bid writing
- AutoCAD-designed plans and specs

EXPERIENCE

The challenge in developing a data center strategy is not just having access to all the specialists, but making sure they communicate their needs to each other at appropriate times.

Members of the Logicalis Data Center Services team include Registered Communication Distribution Designers (RCDDs), Professional Engineers (PEs), Cisco Certified Internetworking Experts (CCIEs), Certified Information Systems Security Professional (CISSPs), Certified ITIL Professionals, and Certified Project Management Professionals (PMPs).

And that’s just on our team. We also know how to talk architectural planning, plumbing, HVAC, structure, electrical and mechanical engineering, and, of course, finance.

WHAT CAN WE DO FOR YOUR ORGANIZATION?

Let Logicalis show you how Data Center Services can help you realize the full potential of your data center. Visit us on the Web at www.us.logicalis.com or call 866-456-4422 today.
