

Our data center facilities housing the Logicalis Enterprise Cloud are world-class data centers supported by highly skilled technical personnel.

The Logicalis Enterprise Cloud Facilities

Logicalis Enterprise Cloud (LEC) is a multi-tiered cloud infrastructure offering a set of predefined services with flexible support levels designed to meet your needs. We offer two cloud data center facilities strategically located allowing our clients to choose a location that works best for them. The LEC facilities support our coast-to-coast public cloud solutions, custom-designed private clouds, or any combination of the two.

The data center facilities housing the Logicalis Enterprise Cloud are world-class data centers supported by highly skilled technical personnel. They are engineered with multiple levels of security, uninterruptible power, redundant HVAC systems, fire suppression and around-the-clock monitoring and management. All Logicalis cloud solutions are available as managed cloud offerings. Management services are provided by our Managed Services Operation Center, headquartered in the Cincinnati OH area.
