

LOGICALIS' **SERVER AND STORAGE** SERVICE HELPS YOU OPTIMIZE YOUR COMPUTING ENVIRONMENT AND IMPROVE PERFORMANCE, UTILIZATION, AVAILABILITY, SECURITY, AND MANAGEMENT.

SERVER AND STORAGE

Logicalis has tremendous experience in design, deployment, and migration of monolithic systems, advanced high-density computing environments such as blade servers, and virtualized service providers, such as cloud technologies. We can develop a solution that meets your requirements for the following:

- Scalability
- Flexibility
- Redeployment
- Ease of management
- Affordability
- Accessibility
- Manageability

Logicalis provides you with a certified, experienced, and proactive team of server and storage specialists who guide your project from start to finish. Our approach is grounded in strategy, not the latest technology trends. We can help you discover efficient and cost-effective ways to make the most of your server and storage technology.

We understand that a typical project comprises a number of significant assessments and decisions, including the following:

- Documenting your current server or storage situation
- Establishing a server or storage management strategy and prioritization plans
- Assigning appropriate availability for each data set
- Fixing what is broken
- Considering whether to consolidate or to utilize a storage area network (SAN)
- Centralizing your server or storage management
- Creating, modifying, or updating your organization's backup and disaster-recovery strategy

“Through it all, Logicalis was a partner that had the ability to help us across the board and to stay with us. They weren’t just somebody who sold us the hardware and walked away. They stayed committed to the relationship.”

Jim Hanrahan, Director of IT, Passkey International

PRODUCT SELECTION

Logicalis has built its business model around helping you use technology to embrace, support, and drive your strategic business processes. We help you manage complexity to meet business challenges with advanced technical skills, world-class products, and personal experience. We measure our success by our customers’ success.

From mission-critical servers and complex wired and wireless networks to high-end storage and operating systems and much more, Logicalis can help you choose the products to create a solution that meets your needs. We are highly qualified to do this because we maintain the highest certifications with industry-leaders HP, IBM, and Cisco to provide quality technology to serve all your business needs.

ADDITIONAL DATA CENTER OFFERINGS

Our Server and Storage Service is part of our larger Data Center Service, which includes the following:

Business Continuity/Recovery — We help you better prepare for incidents that could jeopardize your company’s long-term health and core missions.

Infrastructure Solutions and Design — We have the experience, skills, and resources to help you build your data center from the ground up or redesign existing facilities.

Virtualization — We can help you transform your IT department from a cost center to a competitive advantage.

WHAT CAN WE DO FOR YOUR ORGANIZATION?

Let Logicalis show you how Data Center Services can help you realize the full potential of your data center. Visit us on the Web at www.us.logicalis.com or call 866-456-4422 today.
