

EMAIL MANAGEMENT WITH LOGICALIS HAS HELPED HUNDREDS OF ORGANIZATIONS WITH MESSAGING AND OPERATING SYSTEM UPGRADES AND EMAIL MIGRATIONS.

EMAIL MANAGEMENT

Email is a mission-critical application for every organization today. Regardless of what platform your email runs on, if you're not managing it strategically, you run the risk of it running away with your storage capacity and crippling server performance, perhaps exposing your company to compliance and legal liabilities.

There are many administrative, technological, and even cultural issues that need to be considered as part of a comprehensive email management strategy. Logicalis can help you build an email management and archiving strategy that addresses all aspects of your email environment.

Migrations

Whether you need to change platforms or condense to a cloud, knowledgeable Logicalis consultants are available to assist you every step of the way.

Upgrades

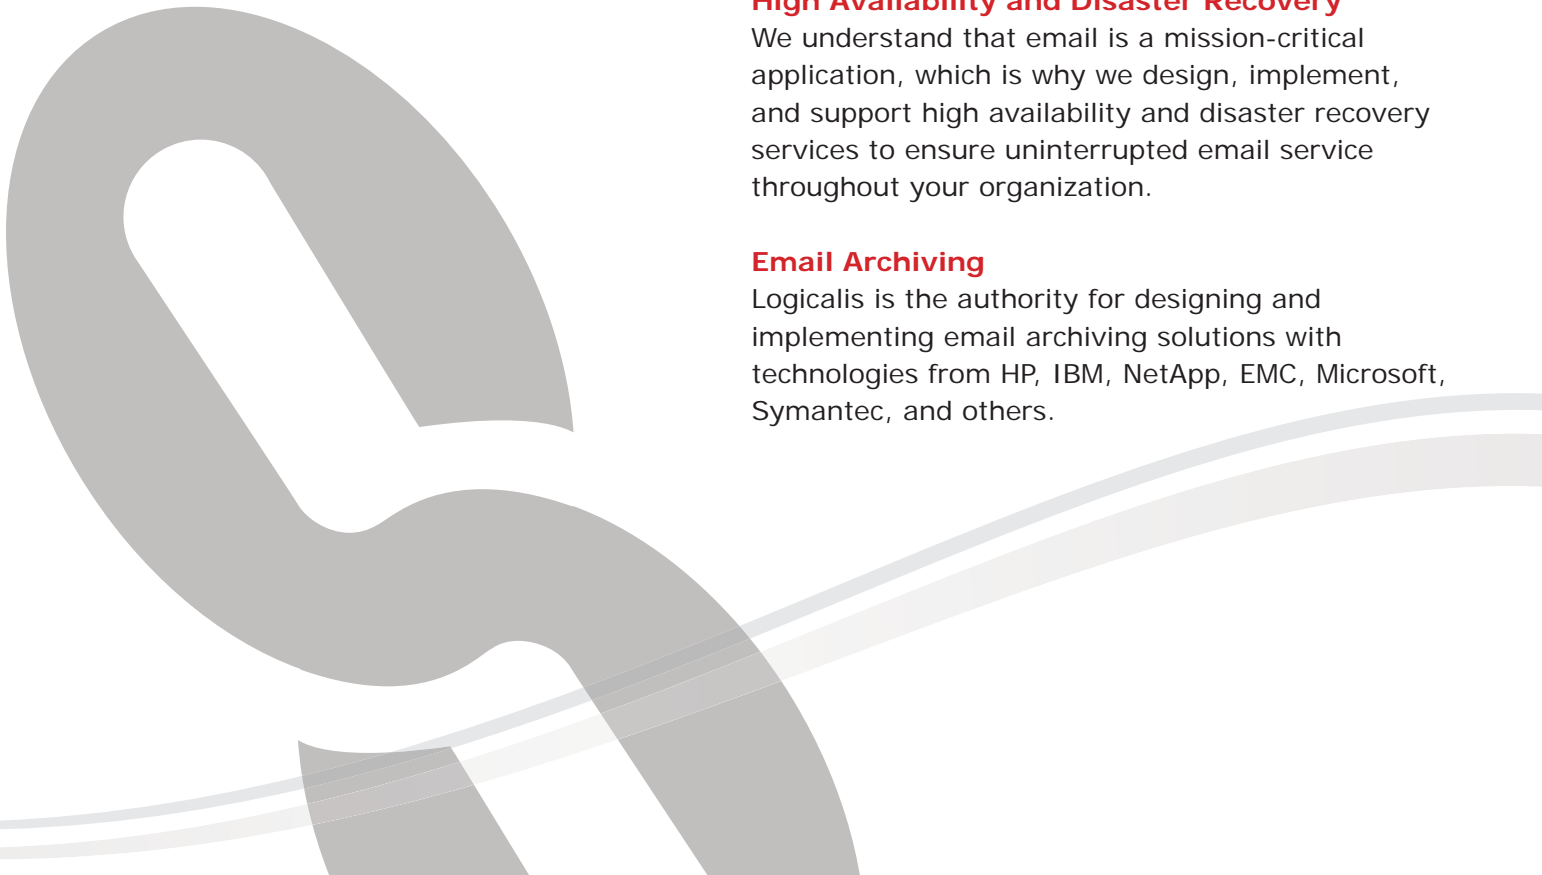

We have helped hundreds of organizations with messaging and operating system upgrades. Logicalis expert consultants have worked in hundreds of environments, giving you the benefit of pitfall avoidance when making highly integrated system decisions. Utilizing our combined experience and your new technology can make your data center faster, leaner, and smarter.

High Availability and Disaster Recovery

We understand that email is a mission-critical application, which is why we design, implement, and support high availability and disaster recovery services to ensure uninterrupted email service throughout your organization.

Email Archiving

Logicalis is the authority for designing and implementing email archiving solutions with technologies from HP, IBM, NetApp, EMC, Microsoft, Symantec, and others.

“The relationship with Logicalis has worked out very well. We’re real honest with them, and they’re real honest with us. We might be able to find less expensive options, but the value of having Logicalis as a trusted partner is worth much more to me than saving a few dollars.”

Matthew Barcus, KnowledgeWorks Foundation

OFFERINGS

Logicalis’ Email service is part of our larger Unified Communications offering, which also includes:

Collaborative Applications – Integrating voice, video, and Web capabilities as part of work, training, or contract review sessions, sales presentations, and brainstorming meetings.

Mobility – Extending unified communications features seamlessly from the desktop to wherever you are.

Networking – Supporting and developing solutions for secure wired and wireless routing, switching, and network management.

VoIP – Unifying voice, video, data, and mobile applications on fixed and mobile networks enables users to easily communicate in any workspace using any media, device, or operating system.

CASE STUDY – KNOWLEDGEWORKS

KnowledgeWorks Foundation is an educational philanthropic organization that relies on email for its communication-intensive objectives. Its volume of email, however, was growing at an alarming rate with its email database tripling in size over three years. That made it difficult for KnowledgeWorks’ IT team to perform a full backup of its Microsoft Exchange email server each night.

Logicalis was able to help KnowledgeWorks make email archiving a priority. Besides understanding the technology involved, the Logicalis team also had hands-on experience with the administrative, political, and cultural implications of actively managing an organization’s email.
