

Logicalis International Data Center Guide

Logicalis Data Center Solutions—We help you bridge the gap between the data center you have today and the data center strategy you will need tomorrow.

Whether you are planning to use our data center facility as your primary data center, as a disaster recovery/failover site or for a variety of cloud-enabled services, Logicalis Data Center offerings will provide you with data center facilities that will ensure the availability and security of your data.

We have data center locations available to our customers throughout the world. The charts below serve as a reference point for locations and the services provided at each location.

For more detailed information, please contact your Logicalis Account Executive.
