Cloud Calling Readiness Assessment

Cloud-delivered Unified Communications as a Service (UCaaS) platforms include the same UC services along with the flexibility you need to run your business.

Today's ever-changing business requirements have many organizations looking for more flexibility from their communication tools. Moving to cloud delivered Unified Communications provides flexibility in many ways, including allowing managed services professionals to manage the tools and support end users. But, moving to a cloud-based solution is not as easy as flipping a switch. Careful planning needs to take place to make sure you choose the right solution with the right features and a well-thought-out migration plan.
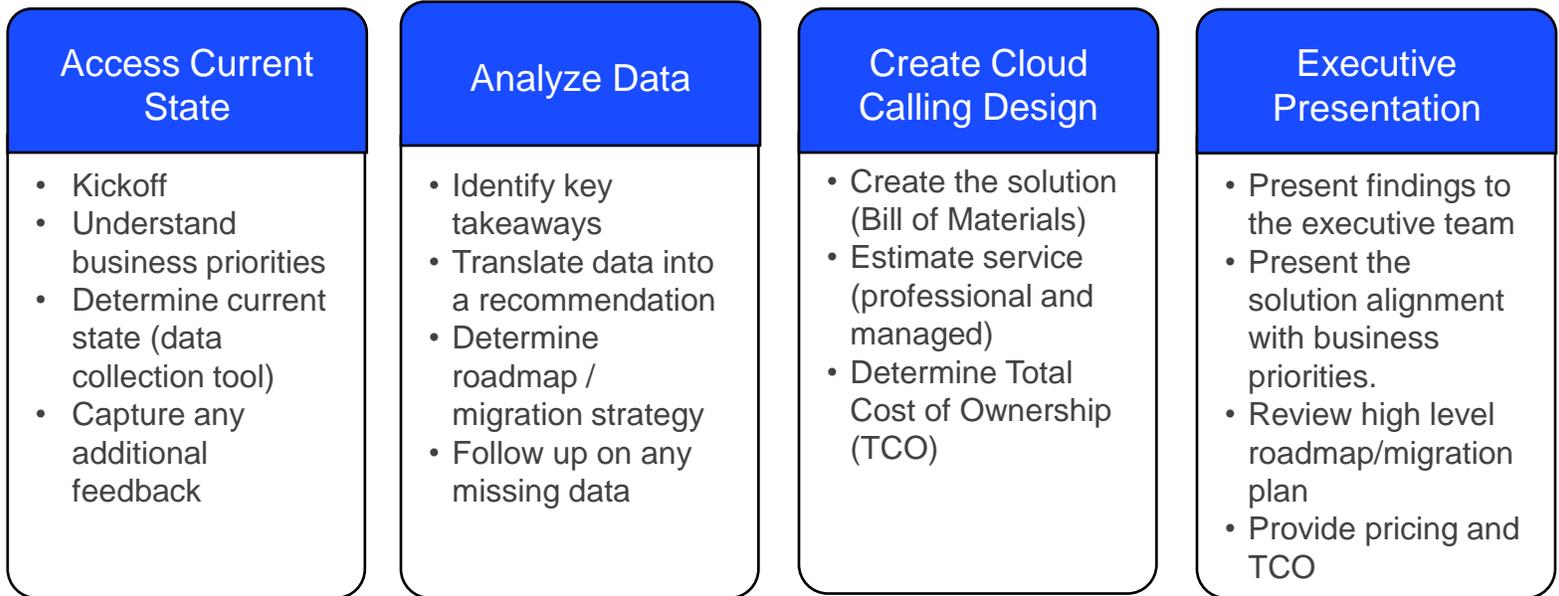

Cloud Calling Readiness Assessment

Logicalis Cloud Calling Readiness Assessment is a no-cost offering that helps you review your calling needs to determine the best options to move to a cloud solution. Led by a certified Unified Communication Solution Architect, this assessment will review your current environment, user requirements and cost models to deliver a cloud calling design and migration plan.

Performing an assessment before moving to a cloud calling solution will help ensure you receive the following benefits from your move:

- Minimizing migration disruptions with an easy user and admin experience.
- Maximizing the value of existing investments for greater ROI.
- Providing interoperability with Webex Calling, Cisco UCM on-premises and third-party PBXs to optimize calling options across your organization.
- Providing simplified purchasing and licensing with the Cisco Collaboration Flex Plan, as well as generous trade-in incentives.
- Supporting other Cisco UC apps including Webex Teams, Webex Meetings, Cisco Unity Connection, Cisco Jabber and Contact Center.

The assessment will include the following:

Access Current State	Analyze Data	Create Cloud Calling Design	Executive Presentation
• Kickoff • Understand business priorities • Determine current state (data collection tool) • Capture any additional feedback	• Identify key takeaways • Translate data into a recommendation • Determine roadmap / migration strategy • Follow up on any missing data	• Create the solution (Bill of Materials) • Estimate service (professional and managed) • Determine Total Cost of Ownership (TCO)	• Present findings to the executive team • Present the solution alignment with business priorities. • Review high level roadmap/migration plan • Provide pricing and TCO

Assessment Deliverables

Once the assessment is complete, the solution architect and your Logicalis Account Executive (AE) will present their findings. The assessment presentation will review your objectives and challenges, assess your specific situation, and provide a recommended roadmap that includes an implementation plan, a suggested timeline, and an estimate of what an implementation may cost.

Logicalis: Your Unified Communications and cloud partner

Logicalis, one of just five Cisco Global Gold partners, can help your organization make a smooth migration from on-premises Cisco UCM—or any other communication and collaboration tool—to the cloud at a pace that aligns with your business strategy.

We'll help you plan and manage the migration, find the best connections to the data centers and perform a complete analysis to ensure you're achieving maximum ROI.

Following your migration, we'll continue to work closely with Cisco to ensure maximum agility, reliability and scalability and that new features and upgrades are completed without disrupting your business.

What can we do for your organization?
