Modern Workplace

Our certified experts can help you design and implement Office365 or Microsoft 365 Enterprise solutions that put the power of secure cloud computing to work for you.

Many organizations have invested in Microsoft as the standard for improved user productivity. Taking the next step with the Microsoft Modern Workplace, which includes Office365 or Microsoft 365 Enterprise, brings improved user experiences and security features to your Microsoft environment.

When reviewing your options, it is important to understand what is available to you with the Microsoft Modern Workplace offerings. Depending on the demands and requirements of your organization, it is important to review all the options and compare the benefits and cost of each. Logicalis has a team of Microsoft Modern Workplace experts who can help you understand the differences between O365 and M365 to determine which is a better fit for your organization.

As organizations take a serious look at security concerns, M365 is the natural choice to help prevent, detect, and respond to emerging threats.

By combining the best of Office 365, Windows 10 Enterprise, and Enterprise Mobility + Security, Microsoft 365 helps you address your most pressing security concerns, such as:

- Advanced threat protection to safeguard emails
- Protecting endpoint devices
- Detecting suspicious activity quickly, seeing threats, and spotting patterns to help secure your business
- Rich reporting that provides insights into who is being targeted
- Management of data protection and compliance needs
- Gaining visibility into Shadow IT and assessing risks—no agents required

Benefits

There are many reasons you should consider moving your Microsoft environment to the Modern Workplace. Regardless of which solutions you implement, you will recognize the following benefits:

- Access to e-mail, documents, contacts, and calendars on nearly any device
- Simple and secure collaboration with colleagues and business partners using Microsoft Teams
- Seamless integration using Microsoft's extensible ecosystem of applications, including Office Pro Plus and third-party solutions for unified messaging and voicemail
- Business-class features, including IT-level phone support, financially-backed 99.9% uptime, geo-redundancy, disaster recovery, and robust security and privacy controls and standards
- Comprehensive solutions, including desktop productivity applications, portals, extranets, external Web site, instant messaging, voice and video conferencing, and Web conferencing

Advanced benefits include:

- Protection of your environment's front door through Identity and Access
- Protection of your company's data across shared boundaries using Azure Information Protection and Windows Information Protection
- Protection, detection, and response to malicious attacks quickly using Advanced Threat Protection and Windows Defender
- Comprehensive endpoint management using Microsoft Intune
