# Desktop as a Service and Virtual Desktop Infrastructure Solutions

With the recent rush to deploy remote workers, many organizations are re-examining their strategies for providing users with remote access to data and applications.

SaaS applications, which have been widely adopted, provide remote access to many productivity applications. However, the recently established work-from-home mandates have left many organizations struggling with how to provide access to all applications.

Standing up VDI solutions quickly to provide access to legacy and on-premises applications has become a critical part of IT strategy. Logicalis can help you revisit your remote desktop and VDI strategy.

Our specialists will help determine which technology is best for you based on your current environment, software licenses, and subscriptions. As with any application, we will make security a top priority.

Our solutions are designed to address the following situations:

- Standing up virtual desktop for remote workers as a primary or secondary manner with base application stacks in a rapid response scenario.
- Standardizing setup in a repeatable manner built to best practices.
- Assessing the need for remote access to on-premises desktops in a secure manner.
- Providing a temporary environment for desktop resources delivered from the public cloud.

## VDI Offerings

### Citrix:

- Cloud to Windows Virtual Desktop – Rapid Deployment
- Cloud to Azure Desktop or virtual applications – Rapid Deployment
- Cloud to on-premises VDI resources
- Citrix remote access to on-premises desktops

### Microsoft:

- Azure Windows Virtual Desktop

### VMWare

- Horizon

### Service Setup Components:

- Build the client-tenant environment
- Configure the platform to meet the client delivery method
- Connect cloud deployments to new or existing Azure subscriptions, including building a VPN connection back to the client data center
- Deploy Cloud Connectors to deliver the desktops to the resource pool
- Build a golden image for deployment if needed

### Add-on Services:

- Managed services for Citrix Desktop access and delivery (does not include application stack)
- Production-ready Azure-managed VDI as a Service
- Production-ready cloud assessment for Azure delivery
- Production-ready cloud security assessment
- NVIDIA virtual GPU for accelerated services
- Application virtualization layer
- On-premises delivered virtual desktops
- Optimized delivery systems to match user profiles to desktop application profiles, delivering only what a user needs and reducing licensing costs
- SD-WAN for session and network reliability

## VDI Acceleration

Logicalis GPU accelerated VDI solutions extends your ability to modern operating systems and high demand applications. The solutions leverage a combination of cutting-edge GPU technology combined with modern compute and storage architectures. C Level leadership.

### Operating Systems

- Citrix
- Microsoft Windows 10
- VMware

### Applications

- Productivity Suites
- CAD/CAM
- Imaging/Video

### Platforms

- Citrix
- Microsoft Azure
- NVIDIA GPUs
- NVIDIA GRID
- VMware
